Ref: Letter of Recommendation

It is with great distinction and pleasure to write this letter of recommendation for Hassan Haq. Mr. Haq interned in our engineering department at Calpak USA, Inc., a contract engineering design and manufacturing firm.

During Mr. Haq's internship, he was tasked with creating, updating, and maintaining engineering documentation such as design specifications, schematics and datasheets for numerous electronic design projects. Furthermore, he has helped with component research and discovery, reviewed electrical schematics, produced wiring diagrams using OrCAD Capture, had direct hands-on experience with bench-testing, production testing, as well as firmware tasks.

Mr. Haq was a model team member and an excellent intern engineer. He is an extremely committed individual and is at all times the upmost professional. More importantly, Mr. Haq is a true team player always putting the needs of the project and company above all else. I highly recommend Mr. Haq for any engineering role in your organization, as he would be an excellent fit for any company.

Please feel free to reach me via phone or e-mail if you wish to seek any further information regarding Mr. Haq internship at Calpak USA, Inc.

Regards,

Danish Qureshi
VP
